

# - Theory of Change - Guidance Principles for the Sustainable Management of Secondary Metals

## ISO IWA Session #3

IUCN, Gland, Switzerland

July 7-8, 2016

Federal Department of Economic Affairs FDEA  
State Secretariat for Economic Affairs SECO

## Definition...

“A Theory of Change is essentially a comprehensive description and illustration of how and why a desired change is expected to happen in a particular context.”

[www.theoryofchange.org](http://www.theoryofchange.org)

# Objectives of the Theory of Change

- **Articulate** the intended outcomes and desired impacts from the implementation of the GPs
- **Define** the strategy and mechanisms to achieve them
- **Support** monitoring & evaluation activities
- **Inform** about vision, goals and how the activities/interventions produce the intended effects

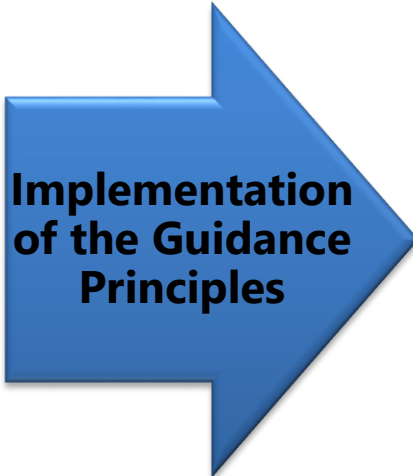

# Desired impacts of the Guidance Principles

Poor health and working conditions

Local communities are negatively impacted by secondary metal operations

Negative environmental impacts

The use of secondary metals produced in a sustainable way is limited

**Implementation  
of the Guidance  
Principles**

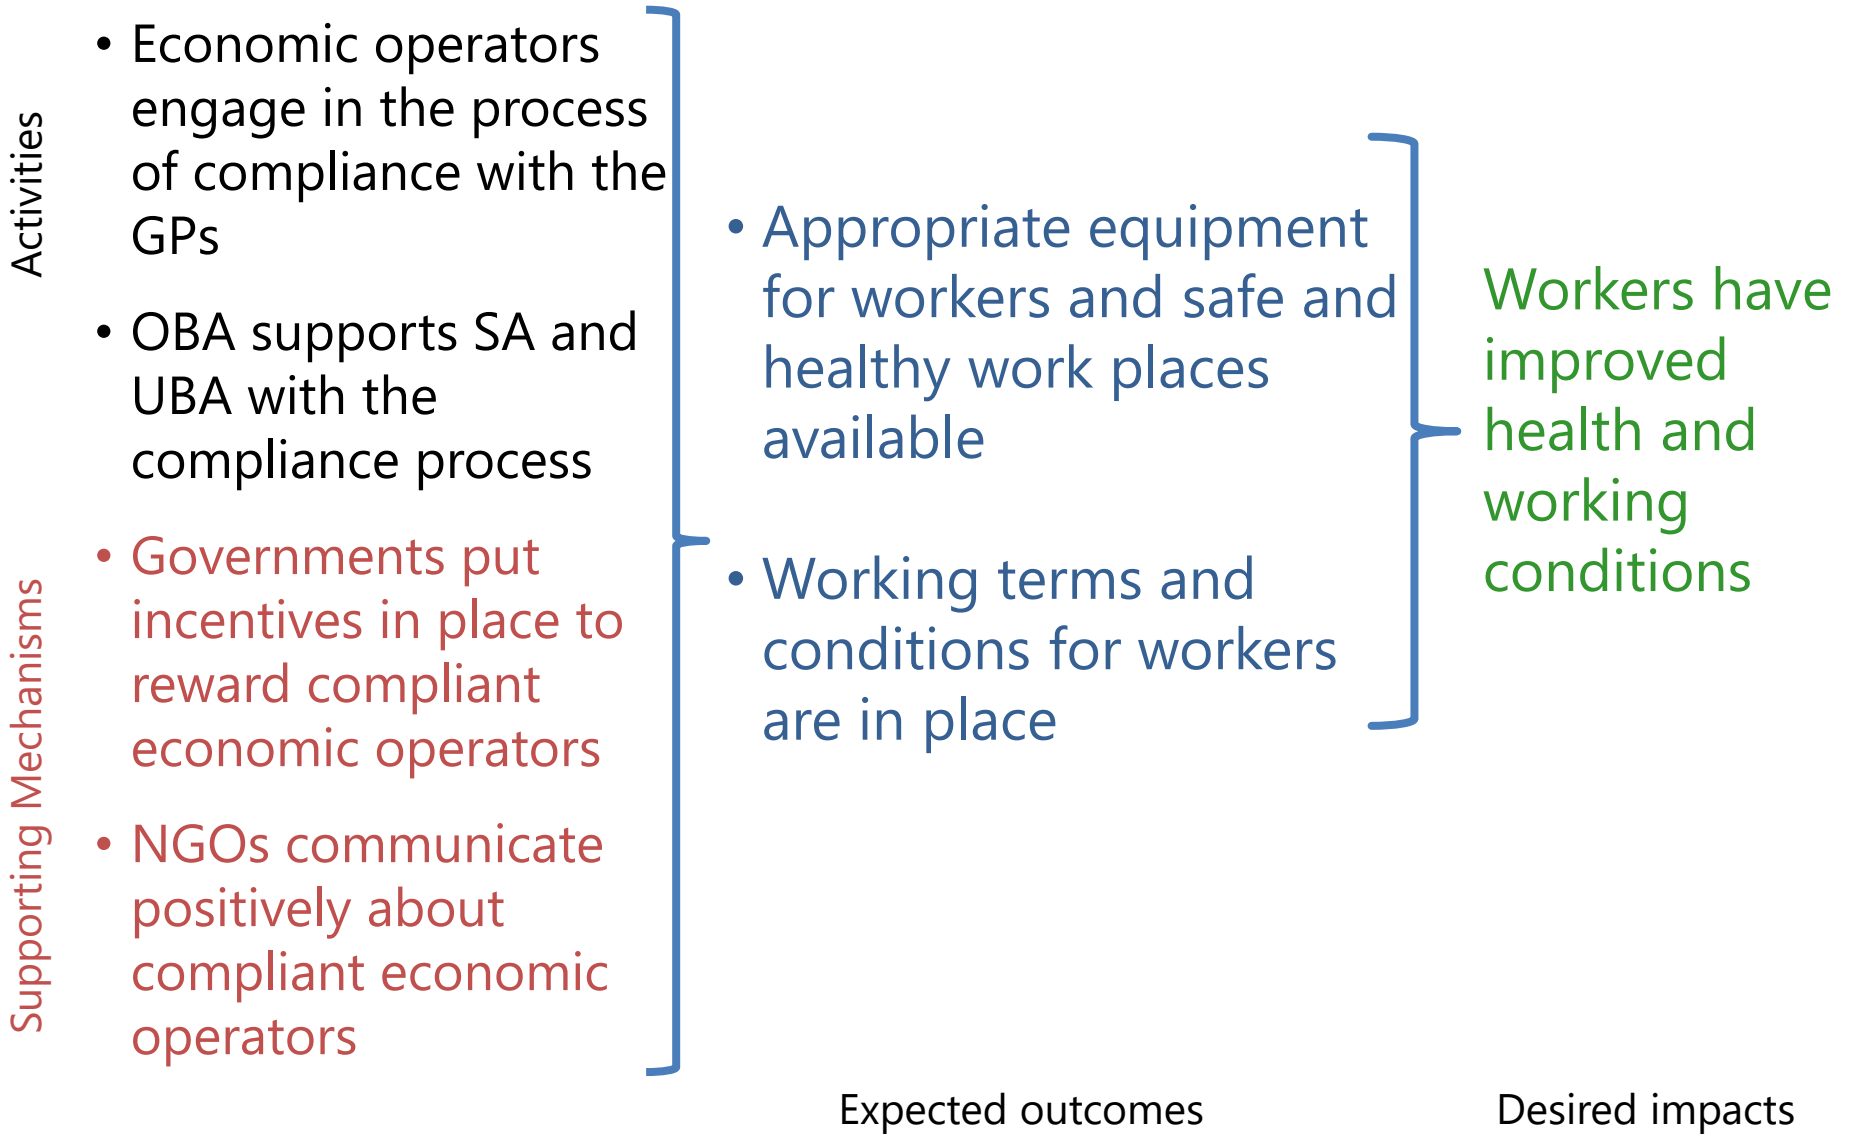

Workers have improved health and working conditions

Local communities are more resilient and have improved relationships

Environmental conditions have improved

The use of secondary metals produced in a sustainable way has increased by x% per year

# From Activities and Supporting Mechanisms to Expected Outcomes to Desired Impacts (Example)

# Plenary Discussion

- Which impacts should the Guidance Principles prioritise in the short, medium and long term?
- What are the activities to achieve such impacts?
- Which indicators can be used to measure impact?
